Cedar Rapids Linn County Solid Waste Agency ("Agency") Special Waste Disposal Authorization Profile

PROGRAM CONDITIONS: The intent of a special waste disposal authorization is ensure safe and proper disposal of non-hazardous industrial process wastes or those wastes which may otherwise present a threat to human health or the environment. If a generator wishes to utilize the Agency's landfill, it is the Agency's right to require that an identified waste stream be managed as a special waste. A waste may be declared a special waste if it has inherent properties that make safe disposal in a sanitary landfill difficult to manage. We require that special wastes delivered to our landfill be pre-approved and conform to the Special Waste Acceptance Criteria (SWAC) as required by the lowa Department of Natural Resources (IDNR). It is the generator's responsibility to ensure that their wastes are declared to the Agency by their hauler, and to confirm that any waste delivered to the Agency's landfill be non-hazardous, and lawfully landfilled under current regulations. By signing and submitting this form, the generator agrees to the Agency's requirements for declaration and disposal of special wastes.

1. Waste Generator Information:				
Contact Name :	Title:			
Generator's Company Name:				
Mailing Address:				
City: State:	Zip Code:			
Email:	Telephone	#		
Address where waste was generated, if different from the aforementioned company address:				
Address				
City State	Zip Code			
Company Name of Hauler or Transporter, if different from the generator:				
Contact Name & Phone				
Address				
City State	Zip Code		-	
2. Waste Characterization: Hazardous waste may not be landfilled in lowa. To demonstrate that waste is not hazardous, the generator must submit a written waste determination, to include Toxicity Characteristic Leaching Procedure (TCLP) test results; safety data sheets (SDS), and/or documentation of knowledge of process to demonstrate that the waste is not a listed or characteristic hazardous waste nor exhibiting the properties of flammability, corrosivity, reactivity or toxicity as defined in 40 CFR Part 261, Subpart D. For raw or virgin materials being disposed of, in lieu of a TCLP analysis, an SDS that indicates the waste is not hazardous may be submitted. The Agency reserves the right to require analytical data and may take confirmatory samples, as necessary. The generator must provide accurate waste determination information to the Agency, and update the Agency in the event of any process changes that alter the nature of the waste.				
Name and description of waste:				
Has any pretreatment been utilized (i.e. solidification, neutralization, etc.)? If so, please describe the process:				
Was this waste generated through waste water treatment, air handling, pollution or emissions control equipment?				
□Yes				
□ No				
Physical state at room temperature?	Percent (%) Solid:	pH:	Flashpoint:	
☐ Solid ☐ Semi-Solid ☐ Liquid	(,			

Does this waste pass the paint filter liquids test? Free liquids are prohibited fro landfill disposal. Free liquids are defined as the liquids produced when a representative sample is placed on a fine mesh #60 conical paint filter for five	□Yes			
minutes. The Agency reserves the right to require a paint filter test be conducted and documented.	D No			
Is this waste a listed hazardous waste as identified in 40 CFR 261? Refer to the following web link to find listed hazardous wastes: http://www.epa.gov/osw/laws-regs/regs/tea.	g <u>s-</u>			
<u>haz.htm</u>	□No			
Does this waste exhibit the property of <i>ignitability</i> as defined in 40 CFR 261?	☐ Yes			
	□No			
Does this waste exhibit the property of <i>corrosivity</i> as defined in 40 CFR 261?	☐ Yes			
	□ No			
Does this waste exhibit the property of <i>reactivity</i> as defined in 40 CFR 261?	☐ Yes			
	□ No			
Does this waste exhibit the property of toxicity as defined in 40 CFR 261?	☐ Yes			
	□ No			
3. Waste Disposal Information:				
Ongoing (or intermittent) with an everage disposal rate now month of				
☐ Ongoing (or intermittent), with an average disposal rate per month of ☐ One time only, with an estimated quantity of	tons tons			
	tons Defore 3 PM, Monday – Friday, auler or driver produce a copy of this			
One time only, with an estimated quantity of DELIVERY REQUIREMENTS: All special waste loads must be delivered to the landfill bunless other delivery criteria are pre-established between generator and Agency. The had of the waste is required to identify the load as a special waste to scale attendants, and puritten authorization paperwork to scale attendants for the first load of waste delivered established.	tons Defore 3 PM, Monday – Friday, auler or driver produce a copy of this

<u>5. LANDFILL INFORMATION:</u> The following section is to be completed by the Agency. The Agency will provide a written approval letter and identify Special Waste Acceptance Criteria for the generator, and Agency scale and operational staff.

FOR AGENCY USE ONLY:			
Special Waste Acceptance Criteria (Material Codes)			
☐ Non-combustible powders, and blast media (103)			
Off-spec or discarded chemical product (1001)			
☐ Waste delivery must be pre-scheduled into landfill (9999)			
☐ Waste must be containerized in boxes, drums or sealed bags (9998; 9999)			
☐ Bulk waste must be wetted or burrito wrapped to minimize dust (103; 9998; 9999)			
☐ Waste must be stabilized for pathogens (1012)			
Generator must ensure that no free liquids are present (1099; 1012)			
Waste has strong odor. Minimize exposure (109; 1099).			
☐ Waste may be caustic or irritant. Avoid eye and skin contact (103; 1099).			
☐ Waste may be reactive, or combustible . Bury separately. Report unusual observations to EHS Manager (1086)			
☐ Waste must be buried immediately upon receipt (9998; 9999; 1086)			
☐ Delivery conditions apply – see profile and letter (9999; 103; 1099; 109; 1086; 1096)			
☐ The following PPE is required for Agency staff:			
Nuisance dust mask for landfill personnel recommended (103; 1086)			
Other:
